

1. Password Recovery System

Test ID	Test Description	Testing Type	Testing Strategy	Test Data	Expected Result	Actual Result	Status
01	Submit valid email for password reset	Unit Testing	Black Box	Sathsarani123@gmail.com	Reset request sent successfully & sent link to email for reset password	As expected	pass
02	Submit empty email field	Unit Testing	White Box	Empty email field	Error message like "Please enter a valid email address"	As expected	pass
03	Submit invalid email format	Unit Testing	Black Box	invalid-email sathsarani12@gmail.com	Invalid email error shown	As expected	pass
04	Reset password using valid Password	Unit Testing	Black Box	Kavindya123	Password update successfully with alert like "Password updated please sign in your new password"	As expected	pass
05	Submit invalid password	Unit Testing	Black Box	Kavindya123	Password policy validation triggered	As expected	Pass

06	Redirect after reset success	Integration Testing	Black Box	Successful reset request	Redirect to dashboard page	As expected	pass
----	------------------------------	---------------------	-----------	--------------------------	----------------------------	-------------	------

2. Server Actions (Security & Data Mutations)

Test ID	Test Description	Testing Type	Testing Strategy	Test Data	Expected Result	Actual Result	Status
01	Create auction with valid data	Unit Testing	Black Box	Auction title, price, category	Auction created successfully	As expected	pass
02	Update existing auction	Unit Testing	Black Box	Updated auction details	Auction updated successfully	As expected	pass
03	Create product with valid details	Unit Testing	Black Box	Product name, price, brand, stock quantity	Product created successfully	As expected	pass
04	Update user role with admin access	Unit Testing	Black Box	Admin role update request	Role updated successfully	As expected	pass
05	Unauthorized auction modification	Integration Testing	Black Box	Unauthorized edit request	Access blocked	As expected	Pass
06	Validate client-server communication	Integration Testing	White Box	Valid mutation request	Correct data transferred and stored	As expected	pass

07	Complete secure mutation workflow	System Testing	Black Box	Create/update/delete operations	Full secure workflow executes correctly	As expected	pass
----	-----------------------------------	----------------	-----------	---------------------------------	---	-------------	------

3. Client-Side Decoupling

Test ID	Test Description	Testing Type	Testing Strategy	Test Data	Expected Result	Actual Result	Status
01	Render AuctionsClient data correctly	Unit Testing	Black Box	Auction dataset	Auction data displayed correctly	As expected	pass
02	Render OrdersClient data correctly	Unit Testing	Black Box	Order dataset	Order data displayed correctly	As expected	pass
03	Verify state updates correctly	Unit Testing	White Box	State change action	State updated correctly	As expected	pass
04	Verify server-client data separation	Integration Testing	White Box	Server fetched data	Data rendered client-side correctly	As expected	pass
05	Verify dashboard page performance	System Testing	Black Box	Large dataset	Page loads efficiently	As expected	pass
06	Verify responsive client interactions	System Testing	Black Box	User navigation/filter actions	Smooth responsive behavior	As expected	pass

4. Dashboard & Filtering System

Test ID	Test Description	Testing Type	Testing Strategy	Test Data	Expected Result	Actual Result	Status
01	Apply single filter	Unit Testing	Black Box	One filter parameter	Correct filtered data displayed	As expected	pass
02	Apply multiple filters simultaneously	Unit Testing	Black Box	Multiple filter parameters	Combined filtered results displayed	As expected	pass
03	Search with valid keyword	Unit Testing	Black Box	Product keyword	Matching records returned	As expected	pass
04	Search with no matching results	Unit Testing	Black Box	Invalid keyword	No results message displayed	As expected	pass
05	Validate order filtering logic	Unit Testing	White Box	Order filter conditions	Correct filtering logic executed	As expected	pass
06	Verify end-to-end dashboard filtering	System Testing	Black Box	Search + filters + pagination	Dashboard filtering works correctly	As expected	pass

Re Testing

Test ID	Test Description	Testing Type	Testing Strategy	Test Data	Expected Result	Actual Result	Status
01	Enter reserve price as zero	Unit	Black Box	Reserve Price: 0	System should reject invalid reserve price	Create auction product	Pass
02	Enter negative reserve price	Unit	Black Box	Reserve Price: -5000	Validation error should display	Product created successfully with alert	Pass
03	Modify product specifications	Unit	Black Box	Change RAM to 32GB	New specification should update successfully	As expected	Pass
04	Submit order with all valid customer details	Integration	Black Box	Name, Email Address, Phone number, Shipping Address, City,	Order should be placed successfully	As Expected	Pass
